1. Restriction to one of the following inventions is required under 35 U.S.C. 121:

- Claims 26-28, drawn to a fence having a cam actuating handle, classified in class 83, subclass 438.
- II. Claims 47-52, drawn to a fence having a positioning window, classified in class 83, subclass 522.17.
- 2. The inventions are distinct, each from the other because the inventions of group I and group II are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, the invention of group I could be used without the window of group II, and conversely, the invention of group II could be used with a screw actuating handle, as opposed to the cam actuating handle of group I. See MPEP § 806.05(d).
- 3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification and because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.
- 4. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one

or more of the currently named inventors is no longer an inventor of at least one claim

remaining in the application. Any amendment of inventorship must be accompanied by

a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
